

David Macdonald Honored with a Special Award from AIA Minnesota

David Macdonald was honored in December, 2008 by AIA Minnesota at their annual awards banquet. David was given a special award by the organization to recognize his creativity, skills and clever solutions in his service to the architectural community as a structural engineer. The award that he received reads: "AIA Minnesota presents this Certificate of Award to David Macdonald for outstanding skill and creative solutions for the architectural profession as a structural engineer".

For over thirty years David has served the architectural profession as a structural engineer and his knowledge is combined with talent and an understanding of the architect's vision to create architecture that is recognized by his peers. Dave commented that he is highly honored by this award "To be praised by your peers for the work you do is truly a satisfying reward and is one of the experiences that makes my efforts so gratifying."

David is one of the principals of Mattson Macdonald Young, Inc. His experience includes all phases and types of structural building systems. He is an active member of the Council of American Structural Engineers, the American Council of Engineering Companies, American Society of Civil Engineers and is an adjunct professor at the University of Minnesota. Dave is a licensed Professional Engineer in the State of Minnesota as well as other locations.
