

**Mattson  
Macdonald  
Young** structural engineers

Jeremy is a pretty chill guy. He doesn't say much, but he eats a lot of Skittles, especially now that they switched from lime to green apple.

### **Jeremy Krook** **Engineering Technician**

Jeremy has been drafting since 1995, adapting as the technologies have evolved. He currently works extensively in both AutoCAD and Revit, heading up drafting and modeling work on some projects and helping out with portions of others. Since joining Mattson Macdonald Young in 2014, he has shared his experience in different construction types, drafting and modeling techniques, and adaptation to new technologies.

Jeremy is a model for efficiency, and is always finding ways to improve or accelerate our drafting. He seeks to minimize re-work while providing a high level of modeling and accuracy for our clients.

#### **Education**

Northwest Technical Institute in Eden Prairie, MN

#### **Project Experience**

Having worked on many dozens of projects, Jeremy's experience is diverse and he has a great collection of projects to his name. With experience in commercial, industrial, utilities, residential and specialty equipment, his project list includes Best Buy, Target, John Deere Foundry, XCEL Tower, Waste Water, Union Depot, Light Rail, and more.
