

MMY Residential Stone Arch Lofts

Architect

Paul Madsen

Contractor

Kraus Anderson

Location

Minneapolis, MN

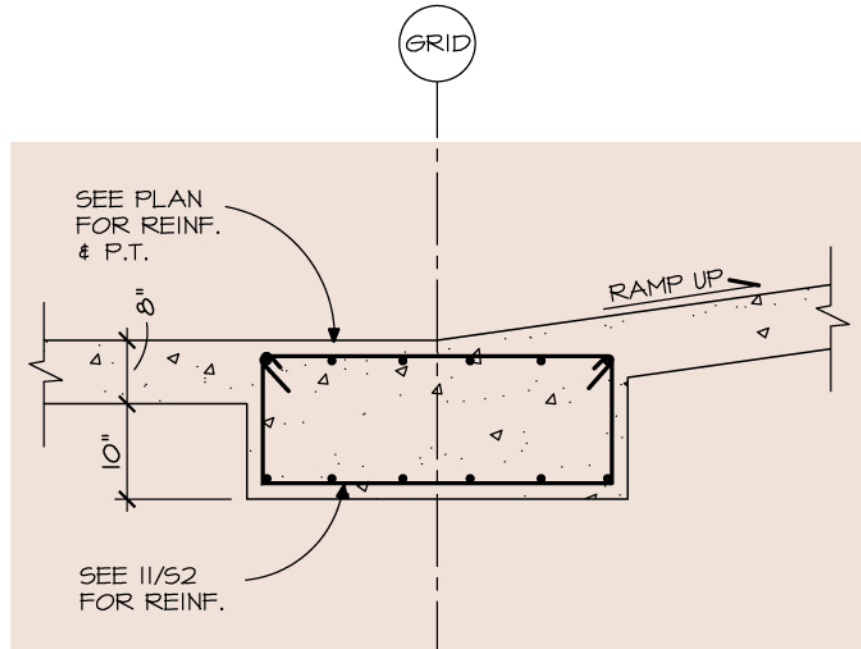

Awards

2003 Minneapolis
Heritage
Preservation
Award and the
2003 AIA MN
Honor Award

Contemporary urban homes built over 19th century mill ruins.

The Stone Arch Lofts is a new post-tensioned flat slab structure built on the site of one of the original mill buildings in the downtown riverfront district.

Eight levels above grade with three levels of parking below, the building had to span over numerous mill race and tail race tunnels carved into the bedrock that were a remnant of the former mill operation.
