## Project Engineer (P.E. or S.E.)

**Description:** Our growing team is in need of an experienced structural engineer able and eager to manage projects while aiding in the mentorship of our engineers in training. Join our team to deliver a great mix of project types, clients, and structural systems! With ongoing and upcoming projects in multi-family construction, post-tensioned concrete office buildings and parking ramps, along with a variety of other projects utilizing steel, wood, concrete, masonry and more, it is an exciting time to gain experience and enjoy the creative and collaborative style at MMY. If you are a self-motivated individual ready to contribute to a talented team, please submit your resume and cover letter to [info@mattsonmacdonald.com](mailto:info@mattsonmacdonald.com).

This full-time position will be compensated with salary commensurate with experience and is eligible for all benefits including health, dental, 401K / profit sharing, paid time off (PTO), and performance bonuses. Relocation assistance is considered on a case-by-case basis.

### Required Qualifications:

- Licensed Professional Engineer (PE) or Structural Engineer (SE).
- 8 years' experience in structural engineering.
- 2 or more years' experience in project management
- Working knowledge and familiarity with building and material codes.
- Experience in a variety of materials and building types, both in design and construction administration.
- Bachelor's or Master's degree in Civil Engineering with Structural Emphasis, or Architectural Engineering

### Ideal Qualities sought:

- Curious & creative problem solver who is in-tune with the industry and technically sharp.
- Approachable, personable engineer who enjoys working with a variety of clients.
- Can independently manage multiple projects while supporting others.
- Familiarity or experience with construction, either residential or commercial.
- Comfortable and adept at communicating personably with architects, contractors, and team members within the office.
- Experience with the following is a plus:
  - Autodesk Revit®
  - Autodesk AutoCAD®
  - RISA
  - TEDDS
  - ADAPT Concrete analysis software
