Revit Technician

Description: MMY is seeking an experienced Revit technician for our team to help with a wide variety of projects and materials. If you are a self-motivated individual ready to contribute to a talented team, please submit your resume and cover letter to info@mattsonmacdonald.com.

This full-time position will be compensated with salary commensurate with experience and is eligible for all benefits including health, dental, 401K / profit sharing, paid time off (PTO), and performance bonuses. Relocation assistance is considered on a case-by-case basis.

Required Qualifications:

- Minimum 2 years' experience as a Revit Technician
- Trained in Autodesk Revit®

Preferred Qualifications:

- 3-5 years' experience as Revit Technician
- Experience producing structural drawings
- Up-to-date with latest Autodesk Revit® release (2017 or 2018)
- Experienced and strong communicator – not afraid to ask questions, but also able to work things out independently to keep production moving and verify later.
- Attention to aesthetics of drawings and deliverables

Ideal Qualities sought:

- Takes pride in producing clean and well-arranged drawings with consistency.
- Experienced in leading production of Contract Structural Drawings.
- A creative problem solver who is in-tune with the industry.
- An approachable, personable person who enjoys working with a variety of clients.
- Comfortable and adept at communicating with architects, contractors, and team members within the office.
- An individual who can manage working on both small projects and tasks as well as larger projects – often concurrently.
- Willing to work on multiple projects during busy season and deadlines.
- Familiarity with construction, either residential or commercial.
- A curiosity for how buildings are put together.
- Engaged and inquisitive, but balanced and productive.
- Experience with Autodesk AutoCAD®
