

Even from a young age, David was interested in buildings and would love to take pictures of them and all their various shapes and sizes. Now he is helping to design them and still loves photography. When not behind a viewfinder, you'll find David playing guitar or a board game, biking, or dreaming of his next vacation.

He and his wife love living in Minneapolis and share their home with their golden retriever and windows full of houseplants.

David Hedberg, P.E.

David started his engineering career in 2013 and later joined Mattson Macdonald Young in 2017. Even in his short career, he has worked on a wide variety of projects both brand new buildings and renovations of existing ones. He has helped design everything from single-family homes and mid-rise apartments to churches, schools, and hospitals. In addition to building design, David has done extensive engineering work with mechanical enclosures and metal fabricators.

Some of his past projects include:

- Venue Apartments – Chanhassen, MN
5-story wood-framed apartments over 2-story precast podium
- Interlude TCU – Fridley, MN
3-story steel-framed medical transitional care unit
- Sanctuary Covenant Church – Minneapolis, MN
Renovation and addition to existing warehouse
- Carver Elementary School – Carver, MN
New school featuring open and flexible floor plans using steel, concrete, and masonry

Education

Bachelors of Civil Engineering – University of Minnesota 2013

Registration and Memberships

Licensed Professional Engineer – Minnesota
