

Jessica enjoys being outside, whether it's hunting, ice fishing, riding horse, or simply playing with her kids on the swing set or in the sandbox. She and her husband have been tirelessly remodeling their home while raising two young children. In her *very* limited spare time, she enjoys knitting, crocheting, running, and building furniture for their home.

### **Jessica LoBello, P.E.**

Jessica joined MMY in 2018 with over six years of experience. Her background includes multi-family wood framing, composite steel, and post-tensioning.

Some of Jessica's note-worthy projects include:

#### Residential/Mixed-Use

- 51 Main – Kansas City, MO.  
176 units of residential apartments, 10,000 Square feet of retail space, 345-stall parking garage, and central amenities area including a pool. Wood framed residential units, mild-reinforced podium, post-tensioned parking garage.
- Varsity Quarters – Madison, WI.  
72-unit student housing development with two lower levels of parking and 7,500 square feet of street level retail space. Wood framed units, precast podium.
- Oxbo – St. Paul, MN.  
191-unit luxury apartment complex with two lower levels of parking and 11,500 square feet of street level retail space. Also included two amenity spaces and several two-level town homes. Wood framed units, precast podium, light-gage framed townhomes.

#### Office

- GS1 Office – South Princeton, NJ.  
42,000 square foot office building. Composite steel framing, steel brace frame, joist and wide-flange framed roof.
- Bunge – St. Louis, MO.  
4 story office building with 120-foot clear span roof for trading floor and executive area. Composite steel framing, steel brace frame, joist and wide-flange framed roof, on drilled pier foundations.
