

Industrial Design Services

Mattson Macdonald Young, a full-service structural engineering firm, provides complete industrial design services. Our staff has experience in a multitude of industrial applications, including:

- **material handling**
bridge, gantry, jib, monorail, mobile, temporary, and custom systems
- **equipment placement**
- **equipment relocation**
- **access platforms**
- **equipment enclosures**
- **building additions & storage areas**
- **moveable roofs**
- **existing system analysis**
- **mezzanines**
- **specialty and custom engineering**

In addition to providing clear and complete drawings and plans, MMY is equipped to handle all of your industrial design needs:

- **calculation submittal**
- **coordination with code officials**
- **professional certification**

Our scope may include subcontracting architects, mechanical engineers, electrical engineers, acousticians, and other specialists as necessary.

ABOUT US

For over 30 years, MMY has provided code compliant structures with economical designs. MMY is large enough to handle big projects yet small enough to maintain personalized communication and coordination. We enjoy the work we do and, most importantly, the people we work with. MMY engineers are licensed in Minnesota, North Dakota, South Dakota, Wisconsin, Iowa and more.
