

**Mattson
Macdonald
Young** structural engineers

Jordan considers himself an avid cyclist in the leisurely, "I'll get there when I get there," sense. He recently completed his first RAGBRAI, a week-long bike trip across the state of Iowa.

In addition to exploring the city on two wheels, Jordan enjoys outdoor activities, like gardening and camping.

Jordan Hurst, E.I.T.

Jordan joined our team in spring of 2016 while completing his degree at the University of Minnesota. He continues to develop his engineering acumen on a daily basis while working closely with MMY mentors. Through an assortment of projects in both new and existing structures, Jordan is gaining valuable experience in design of wood, concrete, steel, and masonry.

During his time at MMY, Jordan has enjoyed the wide range of projects and clientele alike. While he spends most of his time collaborating with others on traditional projects ranging from single-family homes to multi-family apartments and commercial buildings, Jordan also appreciates the unusual design challenges that accompany atypical projects, like designing the structure within a sculpture. With the opportunity for continual growth, Jordan strives each day to become a well-rounded engineer.

Education

Bachelor of Science in Civil Engineering – University of Minnesota – Twin Cities, 2016

Bachelor of Arts in Communication – University of Wisconsin – Milwaukee, 2009
