

**Mattson
Macdonald
Young** structural engineers

Jordan considers himself an avid cyclist in the leisurely, "I'll get there when I get there," sense. In addition to exploring the city on two wheels, Jordan enjoys outdoor activities, like gardening and camping.

Jordan Hurst, E.I.T.

Jordan joined our team in spring of 2016 while completing his degree at the University of Minnesota. During his time at MMY, Jordan has enjoyed the wide range of projects and clientele alike, from aiding homeowners in bearing wall removal to collaborating with architects on mixed-use, commercial, and historic buildings. With the opportunity for continual growth in both new and existing structures, Jordan strives each day to become a well-rounded engineer.

Notable projects in which Jordan has played a key role include:

Great River Landing Apartments – Minneapolis, MN

Five-story mixed use building with 58,000 square feet serving men who are overcoming poverty, homelessness, and criminal background. Four levels of wood-framed apartments over two levels of precast concrete, including a lower level parking garage.

Ojibway Park Building – Woodbury, MN

New 5,600 square foot community gathering space featuring a two-story multi-purpose room. Wood-framed building over precast concrete.

Vertical Endeavors — St. Paul, MN

Adaptive re-use of existing storage facility into 30,000 square foot bouldering gym. Work included a new mezzanine, reinforcement of existing roof structure, and a new patio.

Education

Bachelor of Science in Civil Engineering – University of Minnesota – Twin Cities, 2016

Bachelor of Arts in Communication – University of Wisconsin – Milwaukee, 2009
