Structural Engineer

Looking for something a little different? Ready for a 40-hour week to be the usual, not the exception? Seeking fellow engineers who are creative, personable, and dare we say fun? MMY has always been a little different since our founding in 1983.

MMY invests in its people with flexible schedules, reasonable workloads, and work-life balance. We have also cultivated lasting relationships with our clients built on integrity and quality. We maintain a small team and a flat corporate structure to give everyone a voice in running the firm. Our small size does not limit work variety, however. MMY curates projects ranging from PT office towers to single-family houses, from cutting edge construction techniques to centuries-old historic renovations, and from warehouses and parking garages to art installations and monuments.

If you are an experienced, self-motivated engineer ready to contribute to a talented team, please submit your resume and cover letter to info@mmyeng.com.

Qualifications:

- Licensed Professional Engineer (PE) or Structural Engineer (SE).
- Bachelor's or Master's degree in Civil Engineering with Structural Emphasis, or in Architectural Engineering.
- 5+ years experience in building structural engineering.
- Experience in project management, design, and construction administration.
- Experience in a variety of materials including wood, steel, concrete, and masonry.
- Curious and creative problem solver, in-tune with the industry and technically sharp.
- Approachable, personable engineer who enjoys working with a variety of clients.
- Able to independently manage multiple projects and support staff.
- Comfortable and adept at communicating personably with architects, contractors, and coworkers.
- Experience with Revit, RISA or other 3D analysis software, and Excel.
